## CHANGES TO THE RSICC CODE AND DATA COLLECTION

There was one update to the RSICC catalog for those individuals that may be interested.

### CCC-870/MCNP6.3

The Los Alamos National Laboratory has contributed an update of the Monte Carlo N-Particle® or MCNP® software package.\*

The MCNP®, Monte Carlo N-Particle®, code can be used for general-purpose transport of many particles including neutrons, photons, electrons, ions, and many other elementary particles, up to 1 TeV/nucleon. The transport of these particles is through a three-dimensional representation of materials defined in a constructive solid geometry, bounded by first-, second-, and fourth-degree user-defined surfaces. In addition, external structured and unstructured meshes can be used to define the problem geometry in a hybrid mode by embedding a mesh within a constructive solid geometry cell, providing an alternate path to defining complex geometry. Since the last release of the MCNP® code, major work has been conducted to improve the code base, add features, and provide tools to facilitate ease of use of MCNP6.3 as well as the analysis of results. Details regarding this release are available at [https://mcnp.lanl.gov/release\\_630.html](https://mcnp.lanl.gov/release_630.html).

All the capabilities within the MCNP code can be used on Windows, Linux, and macOS platforms, with the majority of the features capable of parallel execution. The application areas that use the predictions of the MCNP code include (but are not limited to): radiation protection and dosimetry, radiation shielding, radiography, medical physics, nuclear criticality safety, critical and subcritical experiment design and analysis, detector design and analysis, nuclear oil-well logging, accelerator target design, fission and fusion reactor design, decontamination and decommissioning, and nuclear safeguards and nonproliferation.

New Features and Notable Improvements:

- Deprecation and Removal of Old Features and Functionality
- Added Mesh Tally colsci and cfsci Output Formats
- CMake Build System
- Implementation of Mixed-Material Treatment
- HDF5-based Parallel ptrac
- Doppler Broadening Resonance Correction (DBRC) Treatment and Utility Code
- Unstructured Mesh HDF5-based XDMF Output and HDF5 Input File Format

---

\* MCNP and Monte Carlo N-Particle are registered trademarks owned by Triad National Security, LLC.

- Options to Reduce Memory Usage in Burn-up Problems
- Mesh Tally XDMF Output Format
- New Qt-based Plotter in Technology Preview

And others, please see MCNP6.3 Release notes for more info.

The MCNP6.3 package is distributed on 1 DVD that can be read on Windows, Linux or macOS systems.

- Disc 1 of C00870MNYCP00 contains MCNP6.3 source code, pre-compiled executables, and reference documents.
- Disc 1 of C00870MNYCP01 contains MCNP6.3 pre-compiled executables and reference documents.

If the source code version is needed instead of the executable, customers should include a comment that explains why you need the source code version. Requests for the source code version require the approval of the U.S. National Nuclear Security Administration for individuals that are not U.S. persons.

**Thanks to the support of the MCNP® team at Los Alamos National Laboratory, RSICC will be waiving the cost recovery fee for all requests that are submitted before September 30, 2023.**

## **SINGLE USER MULTI-ORGANIZATION LICENSE AGREEMENT**

*(Last updated July 1, 2018)*

To support the use of RSICC software by multi-national organizations and international collaborations, RSICC now offers our customers the option to request a Single User Multi-Organization Software License Agreement. The Single User Multi-Organization Software License Agreement addresses issues regarding the “re-export” of software and data packages obtained from RSICC because under Federal export control regulations our customers cannot “re-export” the code to another person in another country.

This agreement is intended to allow our customers to specify additional foreign locations for which they may be approved to utilize RSICC software. In general, the default option will be the standard single user license agreement for the country in which the customer resides and is employed. The following defines the requirements for use of this license agreement.

This SUMO software license agreement is only available for individuals that receive software directly from RSICC. In addition, the point of contact (host or system administrator) at the additional foreign location(s), must be licensed directly from RSICC and must agree to abide by the policies associated with host/server/cluster systems that are summarized following this announcement.

To apply for this license the customer must first register with RSICC and provide full and complete information. When submitting their request, the customer must provide the following information in the COMMENTS section of the request form for each applicable package:

- full name and email address of the point of contact (POC),
- the full name of the organization at which the software will be used, and

- the complete address (no post office boxes) of the organization under which additional access is being requested.

Individuals that would like to utilize this service must have a valid reason for needing this access and provide such justification to RSICC in the END USE statement as well. If this information is not included in the END USE statement, then the customer's request will only be considered for the standard single user license agreement.

When processing the request, RSICC staff will verify that the designated POC(s) has a valid license for the same version of software that is being requested by the applicant and verify that the POC obtained the package directly from RSICC. If the POC, did not obtain the package directly from RSICC, the POC will need to register with RSICC, apply and be approved for the package before the applicant's request can be processed.

The requests will be reviewed for each designated location and a decision will be rendered as to whether a license is granted. If an organization or location is denied, then the customer will be notified and may be limited to the standard single user license agreement for their own organization.

Exceptions:

Persons that have any citizenship of or are in countries that are not listed in Appendix A of 10 CFR 810 are not permitted to utilize the Single User Multi-Organization License Agreement.

Fees:

The customer making the request for the single user multi-organization software license will be required to pay the cost recovery fee for each location at which they are approved. In addition, the POCs at the other foreign locations that have not obtained the software directly from RSICC will have to obtain the software from RSICC and pay the applicable fee.

## **HOST/SERVER/CLUSTER GUIDANCE**

*(Last updated November 1, 2022)*

Software obtained from RSICC is export controlled under the jurisdiction of the U.S. Department of Energy, 10 CFR 810, or the U.S. Department of Commerce, 15 CFR 730-744. Additionally, RSICC distributes this software under guidance issued by the U.S. Department of Energy's Office of Nonproliferation and Arms Control. The distribution and use of RSICC software is restricted and controlled under these regulations and guidelines. Individuals that request the software must be cleared through both an export control and a nonproliferation review process prior to the individual being granted a license to receive software for a specific end use.

The software distributed by RSICC is licensed to individual requestors (Licensee) under a single-user license agreement while employed at the organization listed on the license forms and cannot be transferred to any other individual or entity. The Licensee is responsible for the control, management and protection of the software. The Licensee is responsible for compliance with U.S. export control requirements (laws and regulations) and the terms of the license agreement. This includes preventing access to the software by any individual or entity (including IT staff) as such access may be deemed an export control violation. Individual Licensees should protect the software, documentation, and installation accordingly. Neither the software nor manuals should be posted to the Internet or otherwise be made publicly available. Any and all system administrators that are assisting with the installation and maintenance of a licensed code(s) or that would otherwise have access to a licensed code(s) that is placed on a stand-alone system and/or server/cluster must also be licensed for the exact version of the

software that is placed on these systems. Individuals whose duties are only that of a System Administrator are not authorized to be users of the licensed codes(s). **Those individuals serving only as system administrators are NOT charged the cost recovery fee for processing their requests.**

System administrators and/or hosts should implement standard and customary account access and/or file permissions such that only the licensed individuals may access the program. This should include identity and access management, such as multi-factor authentication, to ensure software is kept secure from unauthorized access. Please note that the single-user license agreement is code and version specific. The Licensee must be licensed for the specific version to which they are granted access. For example, an individual with a license only for MCNP5 should not be permitted access to MCNP6.1. Additionally, some individuals are only licensed for the executable versions of the code(s), and the system administrator(s) must ensure that such individuals do not have access to the source code. Therefore, it is recommended that the source code be removed after installation of the program(s) and furthermore procedures must be implemented such that control software is not lost via decommissioned storage media.

**Network, server, parallel, cluster, or similar installations outside of the United States may not be within a country NOT listed in Appendix A of 10 CFR 810 nor occur at facility identified as an entity under 15 CFR 744.**

RSICC software may be hosted on a server, cluster or high-performance computing system with the following conditions:

1) Each server/cluster operator must designate one individual responsible for oversight of the use of RSICC software on the server/cluster. This individual will be responsible for communicating and reporting to RSICC on an annual basis regarding the users of the cluster/server.

2) Each and every system administrator that would have access to any form (source or executable) must register, request, **and** be approved for the software with RSICC for the version to which they would have access.

3) An authorized and approved system administrator may install and maintain the software and must ensure that the software is not distributed or shared with those who do not have a specific license for the version to which they would have access. System administrators are required to utilize protocols that limit access to the software. Users should only be granted access and use of software to which they have a specific license, e.g. users that have a license for SCALE 6.1 should NOT be granted access to SCALE 6.0 or SCALE 6.2.

4) System administrators are not permitted to provide access to RSICC software to individuals **NOT** located within the same country as the server/cluster **unless the Licensee has an approved Single User Multi-Organization License Agreement from RSICC.**

5) Individuals with citizenship or multiple citizenships that include a country not listed in Appendix A of 10 CFR 810 may be granted access to RSICC software on a server/cluster, if the individual has been approved for access to the software by the U. S. Department of Energy's Office of Nonproliferation and Arms Control.

6) Under no circumstances should an individual with citizenship or multiple citizenships that include a country NOT listed in Appendix A of 10 CFR 810 be granted access to RSICC software on the server/cluster, if that individual has NOT been approved by the U.S. Department of Energy's Office of Nonproliferation and Arms Control. Additionally, under no circumstances should an individual located at an entity identified under 15 CFR 744 be granted access to RSICC software on the server/cluster.

7) **Individuals that have been only granted access to RSICC's secure cloud server MAY NOT be granted access to any other server/cluster.**

8) When a Licensee requests access to RSICC software on a server/cluster, the system administrator must follow the following process:

(a) The system administrator will require that the Licensee provide proof of a license by requiring that the Licensee provided an electronic copy of either the Single User License Agreement or the Single User Multi-Organization License Agreement. **System administrators cannot provide access to anyone located in another country unless that individual has an approved Single User Multi-Organization License Agreement from RSICC and the organization of the system administrator is listed on the SUMO License Agreement.**

(b) The system administrator must ensure that the Licensee's current installation/affiliation is the same as that on the license agreements.

(c) If the Licensee's current installation is NOT the same as that on license agreements, then access should be denied until the Licensee has updated license agreements with RSICC. This will require the Licensee to update their registration with RSICC and submit a new request with RSICC. The Licensee should not be granted access to the software until they have been authorized. Please note that some approvals are location and organization specific.

9) The system administrator will maintain records of the Licensees that are utilizing the server/cluster and send a record to RSICC ([rsic@ornl.gov](mailto:rsic@ornl.gov)) that include the Licensee's full name, RSICC customer identification number, installation, and the codes to which the Licensee has access on the system. This information must be provided when the system administrator makes the first request to RSICC to provide such services and must be updated annually by sending updated information to RSICC no later than November 30 of each calendar year. The record should include the customer's full name, RSICC customer number, customer installation as well as request numbers and software package name and identifier for which they are accessing on the cluster.

Server/cluster operators that agree to comply with these conditions may install RSICC software on the server/cluster that are within their corporate/institutional ownership, physical control, and the individual country identified.

## **END USE STATEMENT**

*(Last updated September 24, 2021)*

Customers are strongly encouraged to provide full and complete information regarding the intended end use of the software being requested. End use statements that specify that the code is for research, training or educational activities are not sufficient. RSICC's regulators need to know explicitly for what purpose you intend to use the codes and detail needs to be provided. Requests that lack sufficient detail will be rejected. Please include the type of calculations that you intend to perform e.g., criticality, reactor physics, shielding, dose, etc. and for what types of applications e.g., reactor shielding design, fusion shield design, nuclear medicine, reactor design, etc.

Students that submit requests to RSICC are strongly encouraged to consult their professor or academic advisor as to what purpose they intend to use the codes for their classes and/or their research. Professors are also encouraged to provide such guidance to their students since the professor is responsible for identifying the activities of the students under their tutelage. Professors are encouraged to write an end use statement for their students that describe both the intended use of the code and the applications for which the code will be applied. Providing this information will help expedite the processing of the request and speed up delivery of the software.

# REGISTRATION REQUIREMENTS

*(Last updated September 13, 2023)*

During the registration process, individuals are required to provide the name of the institution at which they will use the software, an institutional mailing address and an institutional e-mail address. RSICC's regulators require us to obtain an address associated with the individual's organization. If you are working remotely, you may include an alternate mailing address as a comment during the registration process. Please note that you cannot provide an alternate mailing address that is in a country different than that for the organization with which you are affiliated. RSICC cannot register a customer for access to software in a country different than that of the organization with which the individual is affiliated as the single user license and export control agreements are specific to the country in which the organization is located.

## CONFERENCES, TRAINING COURSES, SYMPOSIA

### CONFERENCES

#### **12<sup>th</sup> International Conference on Nuclear Criticality Safety**

The International Conference on Nuclear Criticality Safety will be held 1-6 October 2023 at the Sendai International Center, Miyagi, Japan. The conference is sponsored by the Japan Atomic Energy Agency. Those interested can find additional details at: <https://icnc2023.jaea.go.jp/>

#### **Best Estimate Plus Uncertainty International Conference 2024**

BEPU is a leading international meeting on the use of best estimate and uncertainty analyses methodologies for nuclear reactor safety analyses. The last BEPU meeting was held in May 2018 in Lucca, Italy. The BEPU2018 conference demonstrated that:

- BEPU applications in licensing are limited and their increase is foreseen to be slow;
- there is a need for comprehensive guidelines for use of BEPU technologies, and the availability of mature tools was questioned;
- consistency in all steps of BEPU needs to be ensured, however it was identified that there is a need to reduce shortcuts in BEPU applications and to focus on exploitation of the full BEPU process;
- experimental data is central to the BEPU processes and methodologies; thus the use the available of experimental data in an efficient and consistent way is required; and
- BEPU is at first a methodology that increases the knowledge and understanding of uncertainties and biases embedded in any deterministic safety analysis.

Given the outcomes of the BEPU2018 conference, the community recognized the need to address some of the identified shortcomings and initiated the planning for BEPU2024. The BEPU2024 Conference

is planned to be organized in two main Tracks devoted to Industrial Applications and Licensing (Track-1) and to Research and Development (Track-2). Plenary Sessions, Regular Sessions, and Panel Discussions Sessions to promote intensive interactions among all conference participants. Poster and student sessions are also envisioned.

Those interested can find additional details at [www.nineeng.com/bepu2024](http://www.nineeng.com/bepu2024).

## TRAINING COURSES

### LANL MCNP6 Class Schedule

Individuals interested in attending or that have registered for these classes are encouraged to contact the organizers regarding any delays or cancellations.

Website: <https://mcnp.lanl.gov/classes.html>

Oct 2 - 6, 2023 Los Alamos, NM	<a href="#">Intermediate MCNP6</a> Non-US citizens must register by 2023-07-14	\$1,800
Oct 23 - 27, 2023 <b>Online</b>	<a href="#">Introduction to MCNP6 (online)</a> Non-US citizens must register by 2023-08-04	\$600
Dec 4 - 8, 2023 Los Alamos, NM	<a href="#">Variance Reduction with MCNP6</a> Non-US citizens must register by 2023-09-15	\$1,800

See the website for more information.

MCNP® and Monte Carlo N-Particle® are registered trademarks owned by Triad National Security, LLC, manager and operator of Los Alamos National Laboratory. Any third-party use of such registered marks should be properly attributed to Triad National Security, LLC, including the use of the ® designation as appropriate. Any questions regarding licensing, proper use, and/or proper attribution of Triad National Security, LLC marks should be directed to [trademarks@lanl.gov](mailto:trademarks@lanl.gov).

## MCNP® 2023 Users Symposium

We are pleased to announce that the MCNP® 2023 Users Symposium will be held as a hybrid event from September 18 – 21, 2022. The in-person event will be held at the Los Alamos J.R. Oppenheimer

Center while the virtual event will be on the Cvent platform. The symposium will include presentations from developers focusing on recent and planned capabilities. Additionally, users of MCNP® are encouraged to propose presentations that highlight unique and challenging applications of the code. The hosts intend to utilize a flexible format to accommodate presentations of varying duration.

Everyone that wishes to participate in the symposium must register at the event website: [www.lanl.gov/mcnp2023](http://www.lanl.gov/mcnp2023). The fee for the in-person attendance is \$200 while there is no registration fee for virtual attendees; however, registration is required of all who want to participate.

Non-U.S. citizens must register and provide the required information by July 12, 2023 whereas U.S. citizens must register by September 12, 2023. Early registration is encouraged of all participants to allow the organizers to optimally plan the lectures and presentations. Please email [mcnp2023@lanl.gov](mailto:mcnp2023@lanl.gov) for any related question or suggestion.

Individuals that wish to make a presentation at the symposium must submit an abstract no later than August 14, 2023. Please see the event website for more information about the abstract submission and required content. Individuals will be contacted regarding their submission by August 28, 2023.

## SCALE Training Courses

Training is provided by developers and expert users from the SCALE Team. Courses provide a review of theory, description of capabilities and limitations of the software, and hands-on experience running problems of varying levels of complexity.

All attendees for the SCALE training courses must be licensed users of SCALE 6.3.1, which is available from [ORNL/RSICC](#) and the [RIST/NUCIS](#) in Japan. Please request a software license at least two months prior to the start of the training course.

All currently scheduled SCALE training courses are described below.

<b>Date</b>	<b>Course Name and Description</b>	<b>Location</b>	<b>Cost</b>
October 2–6, 2023	<b>Source Terms for Advanced Reactor Spent Fuel Applications</b>	ORNL Oak Ridge, TN, USA	\$2,500*
October 9–13, 2023	<b>SCALE/ORIGEN Standalone Fuel Depletion, Activation, and Source Term Analysis</b>	ORNL Oak Ridge, TN, USA	\$2,500*
October 23–27, 2023	<b>SCALE Criticality Safety Calculations</b>	ORNL Oak Ridge, TN, USA	\$2,500*

*\*Full-time university students can register at a reduced rate of \$1,250. For each course over one, professional registration fees are discounted \$250, and student registration fees are discounted \$125.*

*Payment MUST be received at least one week prior to attending the training course.*

For more information regarding these courses, visit the SCALE website at <https://www.ornl.gov/scale/training>.

## **SYMPOSIA**

### **2023 CALENDAR**

#### **September 2023**

**International Conference Nuclear Energy for New Europe, September 11 – 14, 2023**, Portoroz, Slovenia. Website: <https://www.djs.si/nene2023/conference>.

**Conference on Radiation and its Effects on Components and Systems (RADECS 2023), September 25 – 29, 2023**, Toulouse, France. Website: <https://radecs2023.com/>

#### **October 2023**

**12<sup>th</sup> International Conference on Nuclear Criticality Safety (ICNC 2023), October 1 – 6, 2023**, Sendai, Miyagi, Japan. Website: <https://icnc2023.jaea.go.jp/>

**4<sup>th</sup> International Conference on Dosimetry and its Applications (ICDA-4)**, October 16 – 20, 2024, Valencia, Spain. Website: <https://icda-4.webs.upv.es/>

#### **November 2023**

**2023 Nuclear Science Symposium, Medical Imaging and Room-Temperature Semiconductor Conference, November 4 – 11, 2023**, Vancouver, Canada. Website: <https://nssmic.ieee.org/2023/>

**2023 ANS Winter Meeting, November 5 – 8, 2023**, Washington, D.C., USA. Website: <https://www.ans.org/meetings/view-315/>

**7<sup>th</sup> International Symposium on the System of Radiological Protection (ICRP 2023), November 6 – 9, 2023**, Tokyo, Japan. Website: <https://icrp2023.jp/>

**International Conference on Research Reactors: Achievements, Experience and the Way to a Sustainable Future, November 27 – December 1, 2023**, Dead Sea, Jordan. Website: <https://www.iaea.org/events/conference-on-research-reactors-2023>

**World Nuclear Exhibition 2023, November 28 – 30, 2023**, Paris, France. Website: <https://www.world-nuclear-exhibition.com/en-gb.html>

#### **December 2023**

**Materials in Nuclear Energy Systems (MiNES), December 10 – 14, 2023**, New Orleans, Louisiana, USA. Website: <https://www.ans.org/meetings/view-396/>

**44<sup>th</sup> Annual Fusion Power Associates Symposium – Pilot Plants for Fusion Power, December 19 – 24, 2023**, Washington, D.C., USA. Website: <https://fusionpower.org/RegistrationForm.html>

## 2024 CALENDAR

### ***March 2024***

**International Topical Meeting on Nuclear Applications of Accelerators, March 17 – 21, 2024**, Norfolk, Virginia, USA. Website: <https://www.jlab.org/conference/AcceleratorApplications2024>

### ***April 2024***

**International Conference on Reactor Physics (PHYSOR 2024), April 21 – 24, 2024**, San Francisco, California, USA. Website: <https://www.ans.org/meetings/physor2024/>

### ***May 2024***

**Nuclear and Emerging Technologies for Space (NETS-2024), May 6 – 20, 2024**, Santa Fe, New Mexico, USA. Website: <https://www.ans.org/meetings/nets2024/>

**Best Estimate Plus Uncertainty 2024, May 19 – 24, 2024**, Lucca, Italy. Website: <https://www.nineeng.com/bepu2024/>

**15<sup>th</sup> International Particle Accelerator Conference, May 19 – 24, 2024**, Nashville, Tennessee, USA. Website: <https://ipac24.org/>

**International Conference on Nuclear Security: Shaping the Future, May 20 – 24, 2024**, Vienna, Austria. Website: <https://www.iaea.org/events/icons2024>

**International Conference on Decommissioning Challenges: Role and importance of innovations, May 27 – 29, 2024**, Avignon, France. Website: <https://www.sfen.org/evenement/dem-2024/>

### ***June 2024***

**Nuclear Innovation Conference (NIC 2024), June 5 – 6, 2024**, Amsterdam, Netherlands. Website: <https://www.nuclearinnovationconference.eu/>

**2024 ANS Annual Meeting, June 9 – 12, 2024**, Las Vegas, Nevada, USA. Website: <https://www.ans.org/meetings/view-ac2024/>
